

LA MESA WATER COOPERATIVE'S WATERGRAM

January 2010

ELECTIONS COMING

The annual elections of the board of directors for the water cooperative are this April. There will be three positions to be voted upon. No special qualifications are required. We can make use of many talents and will give you "on the job" training. This is a great way to contribute to your community and to learn about the water you drink. To submit your name as a candidate, you need only provide a short biography to George Bailey by March 1. If you have questions, you can contact him at 867-8434 or gbailey25@comcast.net.

BACK OF THE BILL

LMWC has been posting the monthly work schedule on the back of your bills. Take a look there and on the bulletin boards to see if work in your area is being scheduled that might effect your water usage.

ENGINEER NEEDED

LMWC is in need of a Registered Professional Engineer, civil or environmental, to assist in the application to NMED for the arsenic removal treatment system at well # 3. We would prefer a volunteer from the community. A little of your time could help enormously.

STONES

La Mesa Water Cooperative has some left over crusher fine at Well # 5, which is located at 5 Calle Cienega. Members are welcome to come and take some -- first come first served.

THE BIG FREEZE

Just a reminder that watering at night this time of year may lead to problems with your drip system due to freezing.

2010 BOARD MEETINGS

LMWC meets on the fourth Tuesday of the month at the water storage tanks at 5 PM. All meetings are open to the public. For further information you can contact George Bailey at 867-8434 or gbailey25@comcast.net.
